PROFESSIONAL SUMMARY

Front-End Developer with hands-on experience building modern, responsive, and user-friendly web applications. Skilled in developing interactive interfaces, integrating APIs, and creating seamless user experiences. Passionate about writing clean, maintainable code, solving problems, and continuously improving technical skills.

TECHNICAL SKILLS

Front-End Development:
HTML5 · CSS3 · JavaScript (ES6+) · TypeScript · React.js · Next.js · Bootstrap · Tailwind CSS · HeroUI · Flexbox · CSS Grid · Responsive Web Design · Mobile-First Approach

Back-End & Databases:
Laravel · SQL · REST APIs Integration

Programming Languages:
C# (Basic) · C++ (Basic)

Mobile Development:
Flutter (Basic)

Tools & Other Skills:
Git & GitHub · Vercel & GitHub Pages · Figma to Code Implementation · Problem Solving & Debugging

Computer Skills:
Microsoft Word · Microsoft Excel · Microsoft PowerPoint · ICDL Fundamentals

WORK EXPERIENCE

Front-End Developer June 2025 – Present

Self-Employed · Remote – Damascus, Syria

- Developed modern, responsive, and user-friendly websites and web applications using HTML5, CSS3, JavaScript, and TypeScript.
- Built interactive landing pages and multi-section websites with consistent layouts and branding.
- Developed reusable UI components and interactive features using React.js, including Hooks, Props, and State Management.
- Built web applications using Next.js, with a focus on performance and SEO.
- Created responsive layouts using Bootstrap, Tailwind CSS, Flexbox, and CSS Grid.
- Converted Figma designs into responsive and functional web interfaces.
- Integrated REST APIs and handled data fetching, routing, and dynamic content.
- Wrote clean, maintainable, and scalable code following development best practices.
- Collaborated with a Back-End Developer to integrate front-end and back-end functionality.
- Used Git and GitHub for version control, code sharing, and peer code reviews.

- Deployed web projects using Vercel and GitHub Pages.

PROJECTS

KAJO – Integrated Animal Care Platform

React.js · JavaScript · Tailwind CSS · HeroUI · Axios · React Context API

Developed the complete responsive front end of an integrated animal care platform using React.js, Tailwind CSS, and HeroUI, with Dark and Light Mode support. Built role-specific interfaces and dashboards for regular users, veterinarians, pet shop owners, shelter owners, and administrators. Integrated RESTful APIs using Axios to connect front-end components with Laravel backend services. Implemented authentication, authorization, role-based access control, and protected routes to manage access based on user roles and permissions. Developed features for veterinary appointment booking, pet product browsing and purchasing, animal adoption, donations, and lost animal reporting. Built management dashboards for veterinarians, shop owners, and shelter owners, along with an administrative dashboard for managing users, roles, account requests, platform data, and community posts. Developed a community section for sharing pet-related posts, including buying, selling, and lost animal announcements. Used React Context API for shared state management and Git/GitHub for version control and collaboration with a Back-End Developer.

Ateeq Backdrops – AI-Powered Photography Platform

React.js · JavaScript · Tailwind CSS · HeroUI · Framer Motion · Axios · React Context API

Developed a comprehensive, responsive e-commerce platform for browsing, customizing, and ordering photography backdrops. Built interactive user interfaces with engaging scroll-based animations and transitions using Framer Motion. Implemented an AI-powered product visualization and customization experience, allowing users to preview products on selected backdrops and generate custom designs through AI-assisted prompts and iterative refinement. Developed user profile and order-tracking interfaces, shopping cart and booking workflows, and an administrative dashboard for managing products, users, orders, AI-generated designs, customer feedback, and user roles. Integrated authentication, authorization, and protected routes to manage access to platform features. Used React Context API for shared state management and collaborated with a Back-End Developer to integrate front-end functionality with backend services.

EDUCATION

Bachelor's Degree in Information Technology Engineering 2021 – 2026

Syrian Virtual University

Specialization: Software Engineering

CERTIFICATIONS

- 1 Million Prompters Initiative — Prompt Engineering – Certificate of Completion (May 22, 2026)
- Route Academy — Front-End Web Development (January 16, 2026)
